SKILLS

Languages

Python, TypeScript/JavaScript, Java, Kotlin, C/C#, PHP

Frontend & Mobile

React & Next.js, React Native, TanStack Query, Astro, Tailwind CSS

Backend

FastAPI, Django, Express.js, Ktor, REST APIs

System Design

API Design, Database Design, Multi-Tenancy, Caching, SSR/CSR, RLS

AI & Computer Vision

PyTorch, YOLO & DeepSORT, RAG/LLMs, Embeddings

Data & Infrastructure

PostgreSQL & Supabase, MongoDB, Redis, Docker & Linux

LANGUAGES

French	B2
English	B2
Arabic	Native

PROFESSIONAL EXPERIENCE

Software Engineer — Internship

May 2026 – Sep 2026

IBMH Conseils — Expert-Lib / Workplace Suite, France

4 months

- A multi-tenant SaaS connecting field technicians with remote experts in real time, plus an Android app for RealWear AR smart glasses — including a custom two-factor scheme built for hands-free use.
- A generative-AI pipeline that turns raw call transcripts into structured intervention reports, cutting the post-session write-up to zero.
- My first experience shipping code straight to production/staging — built and used by real clients, not just a demo.

Full-Stack Developer — Internship

Apr 2025 – Jul 2025

Together For Chehim, Lebanon

2 months

- A member-management platform with a role hierarchy flexible enough to promote or demote people without ever duplicating a record.
- Automated PDF payment receipts and an end-to-end UI/UX designed in Figma.

Full-Stack Developer — Internship

Jul 2024 – Sep 2024

Nokia, Lebanon

3 months

- An eBook publishing platform where admins pick a release date and the deployment simply happens on its own.
- Full-stack ownership across PostgreSQL, API design, and the Next.js UI, inside an Agile team.

PROJECTS

MultiVisio

Academic Project · ENSTA

A distributed computer-vision system watching many ESP32-CAM feeds at once — flagging abandoned objects and scoring how dangerous each one is before alerting.

YOLOv8 · DeepSORT · ESP32-CAM · React Native · WebSockets

Smart Attendance System

Final Year Project · Lebanese University

An attendance system that runs entirely on a microcontroller — no server, no internet, authentication and storage included.

ESP32 Web Server · C++ · HTML/CSS/JS

EDUCATION

Engineering Degree — Digital Systems Design

2025 – 2027

ENSTA · Institut Polytechnique de Paris, France

Final year

Bachelor's — Computer & Communications Network Engineering

2022 – 2025

Lebanese University, Lebanon

Graduated
